

Quick Start Guide

Here's how to get started:

1. Go to <http://myitrail.com/manuals> and search for this product (iTrail Logger)
2. Download Software for your device
3. Launch Software and connect your logger to activate
4. Once activated Charge your device

Let's Get to Tracking:

1. With your Charged Device, go outside and turn on your logger by holding down the middle power button

2. Once powered, the device automatically begins searching for its connection to the tracking satellites, this is indicated by the **blue** and **red** LED's flashing simultaneously
3. Once both LED's are flashing simultaneously you may begin tracking

Download Tracked Data

- ❖ To Download Tracked Data:
 1. Launch the iTrail Software
 2. Turn off your logger
 3. Plug in your logger to the USB port of your computer
 - i. You should receive a prompt asking to download new tracked data.
Select Yes
